

BALL VALVES - KV2 SERIES

BSP

[CLICK HERE FOR 3D SECTION](#)

TECHNICAL FEATURES AND OPTIONS

- Working Temperature**
-20 °C / +80 °C
- Material**
High Strength Carbon Steel
Stainless Steel
- Operating Pressure**
Up to 500 Bar
- Available Threads**
BSP - NPT - SAE - Metric
- Body Sizes**
DN10-25
- Sealing Description**
NBR - FKM - PTFE - EPDM

MAIN APPLICATIONS

TECHNICAL DRAWING

INFORMATION

- KV2 Series 2-Way Hydraulic Ball Valves are used to shut-off or open the flow passage, and their easy operation provides unrestricted flow.
- The volumetric structure enables rapid and smooth flow and prevents cavitation.
- KV2 Series Ball Valves can be locked open or closed by changing the position of the lock plate.
- The internal ball is made of hard chrome coated steel and the seat is of delrin (POM).

WARNING

- Please ensure that the flow rate is within the usual values.
- Please do not expose to abnormal operating conditions. (E.g. oscillations, impulse pressures, water hammering, cavitation, and proportions of solid materials and abrasives)
- Please do not touch the valves, when the working temperature is lower than -20°C or higher than +50°C.
- Make sure the system pressure is below the maximum working pressure.
- Please ensure the cleanliness of all connection surfaces to avoid dirt or dust accumulation in the circuit.
- Please ensure the alignment and full connection of the assembly parts.
- Please ensure that the OLEOCON product you have chosen is compatible with the temperature, material and pressure requirements of your system.
- Please contact OLEOCON technical support for any further questions.
